

Your Creative Companion from First Sketch to Final Render

For early-stage design development

For high-quality, professional visualizations

WHAT IT IS

A lightweight, real-time design companion integrated into your modeling workflow.

Real-time visualization software with full control over context, realism, and output.

WHO IS IT FOR?

Architects and designers who seek a fast, intuitive way to visualize early-stage designs without switching tools.

Architects, designers, and visualization professionals who want high-end, photorealistic renderings.

KEY BENEFITS

Connected workflow

Visualize designs directly in your modeling software—no extra tools needed.

Real-time creativity

Model faster with instant visual feedback to refine designs on the go.

Easy to learn

Intuitive interface, simple features—no prior experience needed.

Fast & lightweight

A low-impact plugin that keeps your workflow smooth and rendering quick.

Affordable

Essential visualization at an accessible price.

All-in-One

Everything you need for high-quality rendering, all in one place.

Smooth workflow

Works flawlessly with all major CAD and BIM software.

Limitless creativity

Full control over context, lighting, materials, and effects to bring your vision to life.

Fast, intuitive realism

Achieve photorealistic results with minimal effort.

Lasting impact

Create stunning images and animations that set your work apart.

TOP FEATURES

- Real-time camera synchronization
- Time of day exploration
- Conceptual styles
- Enhanced materials
- Physically accurate lighting
- High-resolution (4k) image renders

- 9,900+ library of high-quality assets, including fine-detail nature & PBR materials
 - Time-saving landscaping tools
 - Wide range of atmospheric and post-production effects
 - Advanced animation effects
 - High-quality render output for images, videos, and 360 panoramas
- And much more...

WORKS WITH

Compatible with all major CAD & 3D modeling software: SketchUp, Revit, Archicad, Rhino, AutoCAD, Allplan, Vectorworks, BricsCAD, and more

LICENSING

Available as a user-based license.

Available as a floating license.
